Published every evening, Sunday excepted, by the Tonopah Bonanza Printing Co., Incorporated.

MEMBER ASSOCIATED PRESS MEMBER NEVADA PRESS ASSN

## W. W. BOOTH, EDITOR AND MANAGER

Terms of Subscription by Mail for Daily Bonanza:  
 One Year ..... \$12.00  
 Six Months ..... \$7.00  
 Three Months ..... \$4.00  
 One Month ..... \$1.00  
 Delivered by Carrier, \$1.25 per Month.

A reward of \$10 will be paid for information that will lead to the arrest and conviction of parties stealing The Bonanza from subscribers.

Parties who do not receive their papers, or who have any cause for complaint will oblige The Bonanza by notifying this office.

All legal advertisements will be charged at the rate of \$2.00 per square for the first insertion. There will be no exception to this rate. No advance of publication will be made until the advertisement is paid for.

No advertising out, one square inch or smaller, will be accepted unless made of metal. No wood base cuts this size will be used. Wood cuts are dangerous to forms and press.

Entered at the postoffice in Tonopah as second class matter.

### WILSON DEEMED IT FUTILE TO STAND FIRMLY

PRESIDENT WILSON seeks to justify himself on the ground that it was "futile" and dangerous to "stand firmly." This is an appeal that can with equal truth be made by every soldier who runs away in battle. He further alleges his belief that the cause he championed "has the sanction of the judgment of society in its favor." I remember thirty-odd years ago in the Black Hills a local vigilance committee which was in doubt about hanging a suspected wrongdoer. While they were discussing the matter, there appeared over the neighboring divide a frowzy, elderly horseman in a linen duster, who promptly galloped towards them, waving his arms and shouting "Hang him! Hang him!" The leader of the vigilantes at once asked the frowzy stranger what he knew of the facts, whereupon the stranger answered: "I do not know anything about the facts, and I never saw the man before; but there's eleven of you and only one of him, and I believe in majority rule!" This is merely a picturesque paraphrase of what Mr. Wilson calls action under "the sanction of society." It exemplifies the principle upon which President Wilson has acted in those public matters, internal and external, where he was threatened with the use of force.—From the speech of Colonel Roosevelt at Battle Creek, Michigan, in behalf of Mr. Hughes.

### A LONG NEGLECTED OPPORTUNITY

IN Dixie valley, just beyond the northern boundary of Nye, there are flowing wells being developed and this fertile vale that has hitherto had little agricultural development is likely to become an important farming section. Similar developments are taking place in the southern end of Nye county, where each year the tillable acreage is being added to as the result of finding new artesian flows.

The configuration of Smoky valley is such that there should be no question as to the existence of subterranean reservoirs, pressure upon which is exerted so that pumping would be unnecessary. Very little of the snow and rain that fall on the Toiyabes and Toiyabes is lost by evaporation. It sinks into the earth and is nearly all lost to use, finding its way through underground channels to the Gulf of California.

The springs that gush up in the Smoky valley indicate that there is a large store of water there, and the fertility of the soil is known. It is time to begin drilling operations in that valley and there are opportunities for the development of an agricultural region that will be without peer in this state.

### PROSPECT OF TUNGSTEN FAMINE

THERE is a prospect of another famine in tungsten, says the Boulder County (Colorado) Miner. If there is a shortage of the supply it will be due entirely to the manipulations of the speculators and big steel manufacturers who, when they got a little surplus of the mineral, began to beat down the price to a figure so low as to discourage mining. Together with the depression of prices the buyers showed a reluctance to take the metal, which further discouraged the industry. All this time the reserve of mineral was being depleted and now we are at a point where demand is supplied from day to day by the mines. It is a critical situation and one for which there is no excuse.

If the consumers will establish a firm price and an open market they can maintain it at a figure that will be just to the producers and to the consumers also—a just price. Under such a condition of the market the output of tungsten can be stimulated to meet the demand, not swollen as it was last spring by the extraordinary price which speculators forced. Neither producer nor consumer is benefited by the operations of speculators.

### BE PHYSICIANS UNTO OURSELVES

RECEIVING but brief mention in the press of the coast is the case of Harry Keho of Los Angeles, who was committed this week to an asylum for the insane and will probably remain an inmate for life. The feature of the story is that the complaint of insanity was sworn out by himself and he was the chief witness against himself in the inquiry into his mental condition.

Keho on the stand was well groomed, his expression intelligent and his speech and manner evidenced perfect normality. Yet it developed that he was possessed of a monomania, one that made it likely that he would commit suicide or inflict injury or death upon others. On his own testimony the examining physicians sustained the complaint and he was committed by the court.

The deduction from this story, wherein a man thoroughly analyzes his own mental condition, and every intelligent person should be able to do likewise, is that there is need for everyone to look within himself and determine whether or not he is mentally abnormal, which is only another word for insanity. It is not necessary to commit every insane person to an asylum, for if that were the case the number of such institutions would be multiplied. However, it is a fact that every person who excels along any line of mental prowess has a corresponding deficiency elsewhere in his organism. There never, we have read, have been exact balances established between the development of the cerebrum and the cerebellum. Either our passions rule our judgments or we are so coldly calm that our human qualities are subordinated. Let us look within ourselves and find and correct, so far as we can, our abnormalities. We can be our best physicians in this respect.

### TONOPAH SHOULD FEEL GRATIFIED

THE accrediting of the Tonopah high school in all departments by the University of Nevada is indeed a triumph for the system of this city. It is evidence of a most thorough method worked out to infinite detail. It is a comparatively easy matter to

evolve a school system that through its very superficiality appeals to the public, but the subterfuge is quickly made apparent. What builds up a school system is thorough training in the rudiments and then putting the fancier stuff on top, thus making the education not top heavy. The foundation requires the heaviest material in the building. If it is well constructed, the lattice work, the paint, the plaster, the adornments are all well worthy of attention, for they are built upon a firm basis, yet the foundation is the prime necessity.

The Tonopah high school would not receive full accrediting if it were not for what is accomplished in the grades. There was a time when a graduate of the University of Nevada usually failed to make good in any position requiring an ordinary knowledge of mathematics, use of English and ability to write a decipherable hand. That was because their glibness in Greek and their cordial acquaintance with the nth power had not been preceded by thorough familiarization with the rudiments. The public schools, particularly the primary and grammar grades, had not paved the way. Conditions are now fortunately changed and the merit of the university course is largely due to the careful and scientific training in the public schools.

When we've spent all our pride on the British blacklist, we can still spend our money.—Boston Journal.

It is about time to establish a quarantine against the contagious malady of the strike fever.—Philadelphia Ledger.

Then again, if King Constantine had a case of cold feet, how did he manage to hotfoot it so fleetly?—Houston Post.

Possibly the high cost of living is due in a degree to the low appreciation of necessity for economy.—Cincinnati Tribune.

## SCHOOL OF MINES IS WIDENING INFLUENCE

Under the principalship of E. R. Bennett the Tonopah School of Mines has entered upon its second year with a very promising outlook for increasing its sphere of usefulness. This school was instituted last year as an extension division of the Mackay School of Mines on the theory that a mining camp is the most logical place for practical instruction in mining. It is already gaining considerable prestige in southern Nevada. The initial enrollment for this term was 25, and inquiries from California and Arizona regarding entrance show that the school is attracting attention outside of the state. Most of the students are taking the courses offered in addition to regular daily labor. The instruction is free and classes are arranged to suit the convenience of the students. Last year through the preparatory work done in the Tonopah School of Mines two men were enabled to enter the university this year. New equipment has recently been added to the assaying and surveying departments and will increase

Application No. 4062

Notice of Application for Permission to Appropriate the Public Waters of the State of Nevada

Notice is hereby given that on the 17th day of July, 1916, in accordance with Section 59, Chapter 140, of the Statutes of 1915, one John Esser, of Las Vegas, County of Clark, and State of Nevada, made application to the State Engineer of Nevada for permission to appropriate the public waters of the State of Nevada. Such appropriation is to be made from Currie Well, at a point on unsurveyed land in Nye County, Nevada, at Latitude 26 deg. 53 min. North and Longitude 116 deg. 56 min. West of Greenwich, by means of pipes, and 1-10th of one cubic foot per second is to be conveyed to a point on unsurveyed land in Nye County, Nevada, at Latitude 26 deg. 53 min. North and Longitude 116 deg. 56 min. West of Greenwich, by means of pipes and troughs, and there used for stock and domestic purposes. Water not to be returned to stream.

(Signed) W. M. KEARNEY, State Engineer.

Date of first publication, Sept. 22, 1916.

Date of last publication, Oct. 20, 1916.

## BIDS FOR CRUISERS WILL BE OPENED

(By Associated Press.)

WASHINGTON, Oct. 6.—Bids for the four giant battle cruisers to be laid down next year will be opened at the navy department December 6, virtually completing the work of getting the huge building program authorized by congress under contract. Admiral Benson, acting secretary, announced today that specifications for the ships were ready for distribution to prospective bidders. Bids for the four battleships, scout cruisers and other ships included in the program will be opened October 25, plans having been sent out six weeks ago.

## MONEY CROSSES SEA

(By Associated Press.)

NEW YORK, Oct. 6.—Between seventy-five and one hundred million dollars in banking funds, bankers here estimate, have been transferred to New York from London this week. The movement is continuing.
